

The Guinness Collection at Morris Museum Exhibition Prospectus

A Cache of Kinetic Art: Simply Steampunk **March 15 – July 14, 2019**

A four-year series
featuring a variety of themes,
A Cache of Kinetic Art exhibition
debuted in March 2018

Founded in 1913, Morris Museum is a family-friendly, vibrant cultural center connecting people to the arts, sciences, and humanities. Within a 4,300 square foot gallery, one of the finest and most important collections of its kind is featured in an interactive exhibition:

The Guinness Collection of Mechanical Musical Instruments & Automata

More than 150 pieces from this extraordinary collection takes you on a journey through the history of on-demand musical and visual entertainment, while Viewable Storage provides broader access to the balance of collection.

- ***A Cache of Kinetic Art*** was developed as a 4-year project, and is divided into four theme areas:
 - *Curious Characters, 2018*
 - ***Simply Steampunk, 2019***
 - *Tiny Intricacies, 2020*
 - *Timeless Movements, 2021*

- *Simply Steampunk* pursues the goal of featuring the creative energy and vitality of kineticism, by re-envisioning 19th century aesthetics combined with advances in machine technology. By mounting an exhibition such as this, we intend to draw parallels of innovative engineering, design and imagination of present-day artisans, and draw comparisons to the technical ingenuity and functionality of a bygone era.

- Morris Museum is seeking artistic builders of kinetic works, who fuse innovative design with creative use of traditional and contemporary media. Open to any artist, the goal of this exhibition series is to explore a range of artistic talent, inventiveness in design, and a mastery of technique. It is hoped that by drawing attention to both *Simply Steampunk* and Guinness Collection exhibitions, visitors will gain a deeper understanding and appreciation of this unique art form, by providing a new perspective and fresh insights.
